

Mathematics

Rhythm Winicour-Freeman

Submitted by Gabriel Pretel

Rhythm was outstanding in his SBCC math classes at every step of the way. He started at Math 138 (Pre-Calculus) and completed the rest of the STEM math sequence, consistently shining brightly and demonstrating enthusiasm and superb work ethic. Rhythm showed great interest in understanding the subject matter as well as its applications and connections to physics and engineering. His initiative is exemplary.

He has also helped make SBCC a better place by being a great tutor in the Math Tutorial Lab. Rhythm helps students from all levels and always shows maturity, patience, and kindness to all, and even helps students with their science classes.

Rhythm shows great promise, and we wish him the best as he continues his studies.
